Digital Assets for Schools
The Transperth app

Transperth plays an important role in getting students to and from school, with up to 40,000 students using buses or trains each day. We know children as young as 11 are travelling independently on the Transperth network and we want to make it as easy as possible for them to travel safely and efficiently.

To help with this, our updated app has lots of handy features that can help students and parents alike:

- **Live tracking:** all Transperth bus, train and ferry services can be tracked live on a map
- **Save favourites for easy access**, including routes, journeys and places (such as home, school, stops and stations)
- **Adjust My Account settings and preferences in the app**, and manage SmartRiders for each member of the family
- Plus, notifications in the JourneyPlanner **will let you know if a disruption is occurring**.

Track your child's bus or train trip live.

With the Transperth app you can see when their service arrives to pick them up and you'll know exactly when it has arrived safely at its destination.

Once you've downloaded the app, you simply select the service you want to monitor. As soon as the bus or train starts its trip, a yellow LIVE icon will appear. You can then follow its progress along the route map.

As a bonus, the app can be linked to your Transperth My Account. You can then manage your SmartRider, SmartParker and My Alert subscriptions, all from the same place.

And the best part is, the Transperth app is free. You can download Android and iOS versions now at the App Store and Google Play.
